# Cable Whips & Accessories

For Connectorized Panels

an EnerSys® company

- Integrated latching system minimizes connector/cable footprint

- Polarized housing design ensures proper connections

- Quick and easy connection to service equipment

- 37A (C37) connectorized cable whips available in #8, #10, #12, and #14 AWG; 7 ft and 12 ft lengths

- 100A (C100) connectorized cable whips available in #6, #8, #10, #12, and #14 AWG; 7 ft and 12 ft lengths

Alpha® offers a wide variety of robust cable assemblies for connectorized GMT fuse panels, Matrix breaker panels, and more.

We provide a wide variety of fuse and breaker panels offering models with output connectorization, a large selection of cable sizes and color configurations are available to suit your application. Our pre-terminated connectorized cable whips are assembled and tested in-house to provide a simple plug-and-play solution.

Because there is no need to hard-wire terminations, connectorized cable whips are an ideal solution for saving time and labor during installation and service. Robust output connectors, available in 37A and 100A configurations, feature an integrated latching system to help minimize overall connector and cable footprint. A polarized connector housing design ensures that proper connections are made every time. In addition to our line of pre-assembled connectorized cable whips, we also offer connector kits and crimp tools for on-site cable crimping & assembly.

Our connectorized cable products provide a safe and reliable solution for efficient, cost-effective cable management for your application.

Cable Whips & Accessories Specifications

For GMT 125 Series™, KLM 125 Series™, TPA 250 Series™, and V30/30™ Products

C37 Connectorized Cable Whips
